Technical Skills

Backend Architecture

- **Golang:** High-concurrency REST APIs.
- **Security:** JWT Auth & Secure Flows.
- **Node.js:** Express.js & Legacy Systems.
- **Logic:** Strict typing & Concurrent models.

Frontend Excellence

- **Frameworks:** Vue.js, React, Next.js (SSR).
- **Styling:** Tailwind CSS & Modern UI/UX.
- **State:** Pinia, Redux, Context API.

Data & Infrastructure

- **Databases:** PostgreSQL & MySQL.
- **Optimization:** SQL Indexing & Query Tuning.
- **DevOps:** Docker & Git (Gitflow).

PROFILE

High-impact **Fullstack Developer** with a track record of bridging the gap between sophisticated UI and high-concurrency backends. Expert in leveraging **Golang** for robust, scalable architectures and **Vue.js/React** for intuitive user experiences. I approach development with a business mindset, focusing on system reliability, clean maintenance, and delivering real value through performance-optimized digital products. Committed to transforming complex architectural puzzles into seamless, production-ready solutions.

EXPERIENCE

Frontend Developer (Remote, Brazil) | RV DESENVOLVIMENTO DE SOFTWARES LTDA | Dec 2024 - Apr 2025

- **Frontend Architecture:** Spearheaded end-to-end development using **JSX**, **Node.js**, and **Tailwind CSS**.
- **UI/UX Design:** Built responsive, high-performance interfaces focusing on **Front-End Design** principles.
- **Systems Integration:** Collaborated on **Software Infrastructure** to ensure seamless backend-to-client connectivity.

Full Stack Developer (Freelance) | Doctor Medrano Platform | Feb 2026 - Mar 2026

<https://doctor-oscar-medrano.vercel.app/>

- **Rapid Full Stack Engineering:** Architected and deployed a sophisticated medical platform in just 4 weeks, leveraging a high-concurrency **Golang** backend and a responsive **Tailwind CSS** frontend.
- **Real-Time Scheduling & Marketing:** Implemented complex logic for instantaneous appointment booking and built-in service promotion tools to enhance patient acquisition.
- **Cost-Efficient Architecture:** Engineered a robust, scalable system using 100% free-tier cloud tools, eliminating subscription costs and guaranteeing database longevity without data capacity issues for decades.

CERTIFICATIONS

Full Stack Developer with JavaScript (Platzi, May 2024)

Backend Development with Go (Platzi, August 2025)

Mathematics for Programming (Platzi, September 2025)

Advanced English C1 (Platzi, September 2025)
